

EMILY ROSE SHEREEN FILSOOF

I'm curious, slightly obsessive about understanding things, and happiest when I'm learning something I didn't know yesterday.

I'm happiest when I don't quite understand something yet. I like digging into the parts that aren't immediately visible: why people behave the way they do, how information shapes what we understand, where systems start to break down, and what happens when new technology enters the picture. My background in Digital Design and Information Studies lets me move between research, design and technology without seeing them as separate worlds. I can spend hours trying to understand a messy problem, then get equally excited about turning the idea into something tangible. I learn by getting my hands dirty: asking questions, making things, testing ideas and following the rabbit hole.

EXPERIENCE

MAR 2026 – PRESENT

Duus Partners P/S

Project Specialist, Digital Product Design · Copenhagen

Digital product design, web design and visual communication across client projects.

- Design and build DSB's Vinge og Værksted website, from structure and design in Figma through to launch
- Design and build The Green Log, a digital tool offering 120+ concrete sustainability actions
- Work iteratively, refining designs through feedback and carrying them into implementation
