EMILY ROSE SHEREEN FILSOOF

Digital designer with an MSc in Digital Design and Interactive Technologies from the IT University of Copenhagen and a background in Information Studies. I work across UX, interaction design and web – from research and concept development to finished design and implementation. AI is a natural part of my design practice, and I work at the intersection of design and development, with a particular interest in design systems and how the two disciplines work together.

EXPERIENCE

MAR 2026 — AUG 2026

Duus Partners P/S

Student Assistant (project-based) – Digital Design & Web · Copenhagen

Project-based digital design, web design and visual communication for a range of clients and projects.

- Design and build DSB's Vinge og Værksted website, from structure and design in Figma through to launch
- Design and build The Green Log, a digital tool offering 120+ concrete sustainability actions
- Build and maintain websites in WordPress and Webflow
- Work iteratively, refining designs through feedback and carrying them into implementation

FEB 2025 — AUG 2026

Bæredygtigt Kulturliv NU

Student Assistant – Digital Design & Visual Communication · Copenhagen

Digital design, visual communication and web across the organisation's projects and platforms.

- Design, build and maintain the organisation's websites in Webflow
- Structure digital content in the CMS with a focus on information architecture and interactions
- Develop graphic and visual assets for digital platforms, events and communication
- Produce content for web and social media, and coordinate communication across projects

SEP 2022 — JUN 2024

People-IT

Student Assistant – Digital Design & Communication · Aarhus

- Design and build the company website, owning web design, visual identity and user experience
- Produce graphic material and visual content for social media
- Maintain and qualify freelance IT consultant profiles in the company database, including through direct contact with the consultants
