

EMILY ROSE SHEREEN FILSOOF

I'm curious, slightly obsessive about understanding things, and happiest when I'm learning something I didn't know yesterday.

MSc in Digital Design and Interactive Technologies from the IT University of Copenhagen, with a background in Information Studies. I work across UX/UI, interaction and product design, research and web, from early concept and user research through to finished design and implementation. AI and emerging technology are part of how I work. I use them to prototype ideas and make sense of complex information, while staying critical of their limitations.
